

AMARILLO

Paint-on or spray-on fly trap

An unique non-toxic ready-to-use adhesive Paint-on or Spray-on product used for preparing sticky surfaces to attract and capture flying pests.

Advantages:

- Flexible application: Spray, paint or scroll.
- Apply to poly film (such as pellet wrap), sheet plates or other smooth surfaces.
- Yellow colour for attraction.
- Non-toxic water based product. Does not contain organic solvents, pesticides or pheromone lures.
- Extremely cost effective.
- Ideal for large area treatment and highly infested areas.
- Adhesiveness remains for several months.
- High resistance to extreme environmental conditions (such as rain, moisture, temperatures)
- Adhesiveness can be renewed at any time by applying another layer over to previous layer.
- Wide range of application. Agricultural, horticultural, animal housing, human dwellings, commercial and hospitality environments.

Pack:

- 1 liter (covers 10m²) - AM001
- 5 liter (covers 50m²) - AM002
