

# Bird tape

Optical bird deterring product

*Reduce damage to fruit or fruit trees and unsightly bird droppings around buildings*

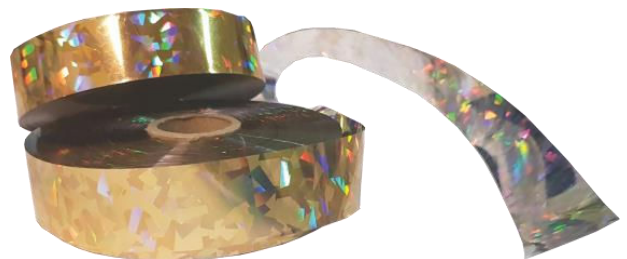

Bird Tape is the ideal, affordable complement to the Eagle Eye system, especially where bird control is needed in large open areas such as in the agriculture.

The Bird Tape is tied to dropper poles or other existing poles around and inside the open area to be protected. Birds are scared by the flashes as well as sound emitted when the tape blows in the breeze.
