

OUTPACE GR

Pre-Emergence herbicide

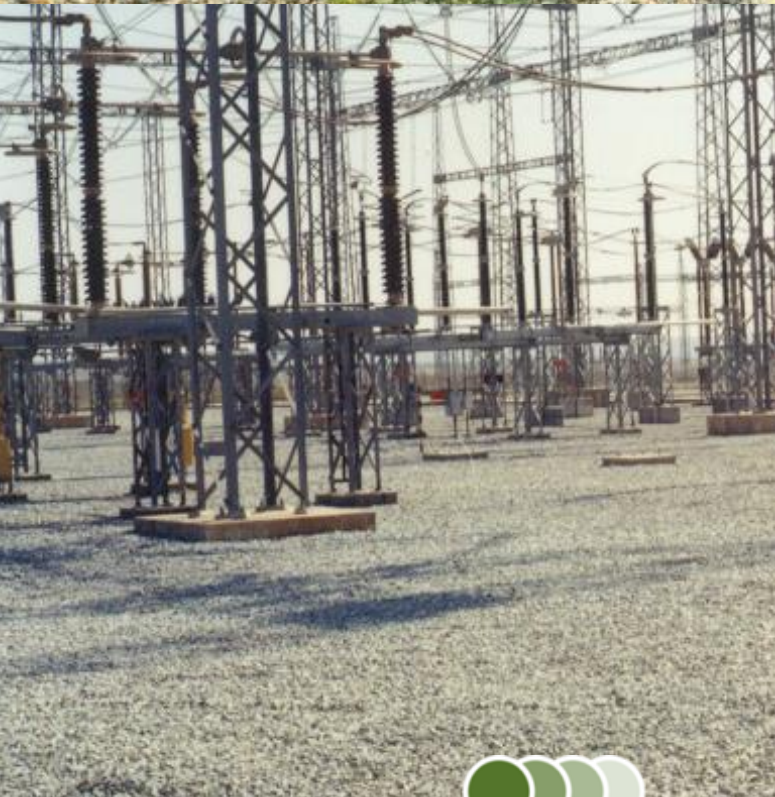

(L. 4140)

Conventional herbicides only control existing weeds and does not prevent re-germination. This leads to short term control and requires regular application.

Water availability, calibration and wind conditions poses problems and risks during application.

OUTPACE GR is a granular preventative herbicide specially formulated for substations;

- *Dry application with granular spreader.*
- *No water, no measuring and no mixing.*
 - *Apply in any weather condition.*
- *Prevents weed for up to 14 months with a single application.*
 - *Safe to use in sensitive areas.*
- *Control existing weeds with a systemic herbicide.*

Application rate: 50 -100kg/ha

Pack size: 25kg
