

OXYTURF

Increase oxygen levels and improve aerobic conditions in the soil

Description:

Provides a solution to anaerobic soil profile conditions and the symptoms thereof by introducing positive beneficial digestive micro organisms into the soil profile and by releasing slow dissolved oxygen into the soil profile

Advantages:

- Black layer
- Penetration compaction
- Course manicuring
- Root system increase

Application rate:

25 litre / hectare 2-3 applications .

Note: Irrigate thoroughly after application.
