

SHARDA ROACH GEL

Attracts and kills cockroaches & their colonies

L.10674

Attracts foraging cockroaches, feed the queen, destroy the nest & the colony

Remains palatable for up to 20 weeks (in dark areas)

Description:

SHARDA ROACH GEL BAIT is a ready-to-use gel bait insecticide for the control of cockroaches in domestic and public health environments.

Active ingredient:

Imidacloprid (Neonicotinoid) 21,5g/kg

Advantages:

- Highly palatable sugar and protein bait matrix.
- Quality bait remains soft and palatable for up to 20 weeks (if applied in dark areas).
- Low application rates.
- Easy and safe to use in sensitive areas.
- Delayed action allows foraging cockroaches to take bait back to the nest, feeding the queen and larvae.
- **Destroy the queen, larvae, the nest and the colony.**
- **Long term control**

Areas for application:

Suitable for use in commercial and industrial premises, warehouses, food handling and processing establishments, market places, restaurants, hotels, hospitals, barracks, ships, offices, store rooms, schools and homes,

Application:

Apply where there is presence of cockroaches or areas where its presence is suspected such close to water sources, inside cupboards or heat from electrical motors. Apply in dark areas and well out of sight.

Apply drops of 3 – 6mm /10 m².

Notes:

The gel will remain pliable and palatable to cockroaches as long as it is visible; usually for up to 20 weeks. If infestations are high, inspect the gel after 4 weeks of treatment and replenish if necessary. Daylight conditions will reduce the longevity of the bait.
