

SLIDER BEDBUG MONITOR

Attracts and captures bedbugs

Bedbugs explore the SLIDER's design and textured base

Bedbugs are trapped in adhesive and easily detected through clear window

Detect bedbugs before it's too late! The Slider™ is designed to catch bedbugs as a means of monitoring for the first signs of an infestation. Bedbugs and insects are attracted to the textured base of the Slider™. They explore the base and are trapped in the Slider adhesive formulated for bedbugs and insects.

The clear window allows for easy inspection. The Slider™ can easily slide between the mattress and box spring. Place under four corners of mattress. The Slider™ can also be placed under couch cushions and in other upholstered furniture, under crib mattress, inside luggage, in cars and under car floor mats, in and around cubbies/lockers at schools, and along baseboards.
