

SOIL-SURE is a natural source of nutrients, organic acids and soil conditioners.

The nutrients in **SOIL-SURE** and its breakdown components will stimulate plant roots and beneficial micro-organisms while the organic acids reduce soil fattiness and soil compaction optimizing water and root penetration. **SOIL-SURE** enhances soil life and stimulates the recovery of healthy soil conditions after soil sterilization.

BENEFITS

Registered under Act 36 of 1947 (B4700)

Nutrition – promoting root development plus food and energy source for beneficial micro-organisms

Chelation – organic acids in Soil-Sure are highly effective, natural chelating agents improving the uptake of fertilizer given, unlocking unavailable nutrients and facilitating nutrient assimilation

Protein building - offer an instant, energy-efficient plant nitrogen supply.

Enhanced quality – improve the quality and shelf-life of fruit and vegetables.

Leaching – high sodium levels can be lowered with regular use.

Reconditioning – organic acids in Soil-Sure reduces soil fattiness and soil compaction increasing oxygen levels, water and root penetration.

PACKAGING

5 L, 25 L, 1000 L
Product Code: SOIL

APPLICATION RATES

SOIL APPLICATION:

1 L per 100 L water up to 10 L/ha equivalent as a natural nutrient source or 300 mL/ha as a chelating agent. Repeat monthly.

SPOT-SPRAYING:

100 mL per 10 L water. Apply as required.

FERTIGATION:

10 L/ha as a natural nutrient source or 2 L as a chelating agent.

HOME GARDEN APPLICATION:

Dilute 15 mL per 9 L watering can and apply the diluted mix at a rate of 1 litre per square metre. Apply fortnightly or as required.

TYPICAL ANALYSIS W/V

Total Nitrogen (N) (as organic)	4.3 g/kg
Total Potassium	13.9 g/kg
Boron	468mg/kg
C	80 g/kg
Free Amino Acids	28.27%
SG	1.1
pH	2.9
Appearance	Brown liquid

INSTRUCTIONS

Shake or stir well before use. Sensitive plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind speed), prior to application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

IMPORTANT

- It is possible to create a phytotoxic reaction if amino acid products are applied in concentrated form. Do not exceed 2:100 concentration.
- Avoid spraying close to harvest if produce is susceptible to staining.
- Note: Product in 1000 L tanks may weigh over 1 ton. Forklift with 2 ton lifting capacity is recommended.

STORAGE & HANDLING

Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form. Seal lid/cap immediately after use to prevent contamination of airborne microbes.

Disclaimer: Any recommendations provided by 'Wolseley liquids CC' or its Distributors are advice only. As no control can be exercised over storage, handling, mixing, application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application or use will be accepted under any circumstances whatsoever.
