

Dustbuster-Air

Airborne dust control

Reduce the negative effect of airborne dust on industrial facilities

Airborne dust leads to health risks, damage to equipment and has a negative impact on plant growth and the environment.

Benefits:

DUSTBUSTER-AIR contains advanced surfactants that modifies water. Droplet size is drastically reduced leading to a drastic increase of the surface area of the treatment water. 85% of superfine dust is successfully captured with a 90% reduction of water usage.

Usage:

Apply with a high pressure misting system to reduce dust around;

- Underground mining
- Crushers
- Conveyer transfer points
- Ore and product dump areas
- Screens and screening rigs

Application rate:

Use 5 liter DUSTBUSTER-AIR in 100 liter water

Packaging:

25liter containers.
