

Dustbuster-Soil

Surface dust control

Reduce the negative effect of surface dust on roads

Airborne dust leads to health risks, damage to vehicles, equipment and has a negative impact on plant growth and the environment.

DUSTBUSTER-SOIL is an innovative formulation of aqueous dispersable fine particle size co-polymers, anionic polyelectrolyte polymers creates a durable cross linked matrix with the surface of the road.

Benefits:

- Drastically reduce dust on roads.
- Bind super fines that create dust.
- Increase the road surface integrity.
- Increase period of dust control from 40min to 5 days per application .
- 50X less water consumption.
- Smaller application vehicles.
- Reducing treatment cost.

Usage:

Treat road surface on mines, public roads nature reserves and farm roads.

Application rate:

Apply with a water bowser;
1st application (shock treatment) – 25-40%
2nd application – 5%
3rd application – 0.5% and 1%.

Packaging:

5 & 20liter containers.
